No. 7

IT'S BILL BRUNDRIT FOR PRESIDENT

During the coming year as never before the Engineering Society needs at its head a man who has had experience and is capable of carrying out the functions of the Engineering Society.

Bill Brundrit as Secretary-Treasurer of the Class of 4T2 and this year as Treasurer of the Engineering Society has had the opportunity to obtain the experience and has made the most of it. During the past year he sat on the School Dinner, the School At-Home and the School Nite committees. Bill worked hard to help these affairs be the real successes that they were and deserves considerable credit for his part. The experience gained through this committee work has enabled him to get a clear view of that part of the Engineering Society's operation which would be invaluable to you as members of the Society if you should elect him President.

Bill has always had the interests of The Little Red School House at heart and has always endeavoured to do his part to keep the School flag flying. This is shown by the fact that he is a holder of a School "S", having helped the Golf team win the championship this year.

Bill makes no promises that he has no intention of keeping or promises that he cannot see his way clear to fulfil but he does guarantee to give all the Schoolmen a square deal and an even break.

In everything he has undertaken he has put energy, thought and imagination, amply illustrating his capability of assuming the job of President. Vote BILL BRUNDRIT for PRESIDENT and be sure of maintaining the high standards the Engineering Society has built up in the past.

FOR ELECTION RESULTS
FRIDAY EVENING

Phone: MI. 6897

Between 7.00 and 10.00 P.M.

PROGRAMME

12.00 noon—Assemble outside north door of School Building. Parade with Pipers to Hart House. Proceed to the Great Hall for special luncheon at "Popular Prices."

1.00 P.M.—Return to School Building to exercise lungs and franchise.

2.00 P.M.—Educational facilities are available.

3.00 P.M.—Polls close.

POLLING STATIONS ALL IN ENGINEERING BUILDING

1st year—Top Floor.

2nd year—Second Floor.

3rd year—Main Floor, Machine Design Lab.

4th year—Main Floor, Main Hall.

Polls open from 1.00 to 3.00 P.M.

Serve By Saving
BUY
War Saving Stamps

LEITCH THE LOUSE IS ON THE LOOSE

"Every engineer is by nature an economist" is a saying that everybody knows, and recognizes as an unquestionable truth. "LEITCH for President" is another one. Thinking men in every year and department of the old school nod wisely and say, "It must be LEITCH". It shall be LEITCH.

Let us examine LEITCH'S record for the past three years and see why this broken-down Vice-President is the people's choice for President.

As 2nd Vice-President of the Engineering Society this year he was in charge of the store, the largest student store in Canada. On him fell the responsibility of ordering and supervising the sale of more than \$17,000 worth of merchandise. He made a splendid job of it. Prices were raised 200% over last year's, and high quality Canadian and American goods were replaced by cheap Japanese and Italian goods.

He has been exceptionally active in athletics, particularly on the Bingo Team. He is the proud possessor of a large "S" but refuses to state what the "S" stands for.

In the days when we used to go up and watch rugby games in the stadium on Saturday afternoons, LEITCH was in charge of the half-time skits. He earned the eternal gratitude of the stadium officials by emptying the place at half-time week after week.

For three years now he has taken part in the School Nite Revue. In addition he had complete charge this year of all arrangements for School Nite—picking the bands, swimming and gym shows, magicians and hat-check girls.

Two years on the Engineering Society Executive, as Secretary and 2nd Vice-President, have given him valuable experience in the affairs of the Society, and this experience is what makes him the obvious man for the job of President. So let's get behind Jack Leitch, fellows, and push him over the top—and out of sight.

LEITCH FOR PRESIDENT

The Toike Oike

SPORTOIKE

DEAR TOIKE OIKERS—

It gives me great pleasure to again greet you upon this happy election day. School is still leading the faculties in sports—but of course you all know this. But, do you know that others are close on our tail and we must still keep in there fighting? The Senior assault-at-arms must prove a fertile field from which to garner points. Senior and Junior School Hockey Teams are right up with the leaders and we will risk our shirt on a finish modelled after the Mulock Cup Fashion. School III Hockey Team would welcome some more hockey stalwarts with open arms, so you modest stars, come on out and shine.

Hats off to those chaps who have obtained positions on the greatest teams organized to-day, we mean of course, His Majesty's Army, Navy and Air Force. We miss them, their ever loyal support in all School activities, and join with you all in wishing them every success in the most important game of all.

As regards the elections, you will all vote, but remember that School's reputation and success in many activities and her social life is in the hands of those whom you elect. A word to the wise is sufficient.

And now one and all, set aside some alazuma for the annual post-election sortie and remember, the third seat in the front row is reserved.

With all good wishes to the blotter and blurb men—not to mention the posters.

Au Revoir,
DUD BARNES.

MILLER FOR VICE

The chief duty of the First Vice-President of the Engineering Society is to be chairman of the various entertainment committees. In Frank Miller you have a man who knows how to put over these entertainments.

Next year you will be celebrating your 52nd Skule Dinner. A glorious tradition like this must not be broken; so you need a man to really put it over: **FRANK IS THE MAN.**

To ensure a good At-Home, it is essential that arrangements for the dance be in the hands of a man who has organizing ability plus common sense: **FRANK IS THE MAN.**

School Nite this year was a glorious party. To make sure that you have one that is just as good or better next year, you need a man who knows all the phases of this function. Anyone will realize that the man who played the barker in the show this year has what it takes to give you a good School Nite next year: **FRANK IS THE MAN.**

A second and very important duty of the First Vice-President is to be the president's right hand man in every duty. This takes a man with ability, integrity, dependability and personality: **FRANK IS THE MAN.**

ELECT MILLER.

PECK TURNER FOR FIRST VICE-PRESIDENT

You Schoolmen, looking back over a successful year will want to look forward to a year that will measure up to or top your present expectations. To accomplish this you must elect a responsible executive for your Engineering Society.

The 1st Vice-President is a key man on your executive as he is chairman of the committees which organize your main social functions, namely, School Dinner, School At-Home, and School Nite.

Fellows, I believe that I have the organizing ability, enthusiasm and the experience necessary to competently represent you as 1st Vice-President. So on election day turn to Peck Turner for 1st Vice-President of the Engineering Society and approach the new term with confidence.

BOB GUNDY NOMINATED FOR FIRST VICE-PRESIDENT OF ENGINEERING SOCIETY

Did you enjoy School Dinner?—and School At-Home?—and School Nite? Of course you did—thanks to Bill Brown our 1st Vice-President. Have you seen a little dark man trailing Bill around the halls. Well that smiling, smirking, little man's name is Bob Gundy and he's been watching Bill's every move (even in the basement), so he'd be able to take over Bill's job some day.

Gundy was active on both the "At-Home" and School Nite Committees and assisted in sales for School Dinner. He has seen all three take form and understands their organization. So let's let Gundy handle it. Experience counts!

Bob's executive experiences include such jobs as Secretary-Treasurer of Third year and Secretary of the Civil Club last year.

Gundy has your interests at heart and realizes that Schoolmen deserve a little relaxation once in a while in the form of a good brawl. To prove this he says he'll sit up until 2.00 a.m. every night next summer thinking up ways to make "School Dinner", "School At-Home", and "School Nite" bigger and better than ever next year.

Put one beside Gundy, your troubles are through

All thru next year's "benders" he's planned out for you

No need to toss coins, nor rattle the dice

Why gamble? Where Gundy's the man for First Vice.

ALUMNI

The School Alumnus, although not in actual evidence around the university buildings, is always 'way back there, in spirit. All through the day of any School man, little incidents occur to remind him of his early associations at old S.P.S. To bring back these memories more vividly and more often is the reason that many a Toike Oiker has decided that he should get together with others of his kind and form some kind of graduate group. From such a start many of the alumni sections in all parts of the world have had their beginning.

ALUMNI

(Continued from page 2)

Shortly after, realizing the potentialities of their group, a movement has gotten under way to do something for somebody. Nearly always besides lending leadership to local efforts, in some way or other, the Little Red School House has obtained the benefit of their work.

Already, this year, the members of the graduating class have had in mind the founding of such a group. From the material available a highly successful organization seems to be guaranteed and may good times and good works should be achieved. Soon the 4th year will actually be making the choice of their Permanent Executive. They should bear in mind that these men will represent and lend impetus to all their graduate activity. Our advice would be—choose well and lend your full support in the years to come.

The first appearance of the 4T1 Permanent Executive will be at the Toronto District Dinner on Saturday, March 1st. Here the Graduating Class will be formally inducted into the Engineering Alumni. 4T1 should remember to keep this date open.

D. G. RITCHIE,
Chairman, Undergraduates
Relations Committee.
